WELLHEAD PROTECTION IN THE CITY OF FENTON

www.cityoffenton.org

Mission Statement

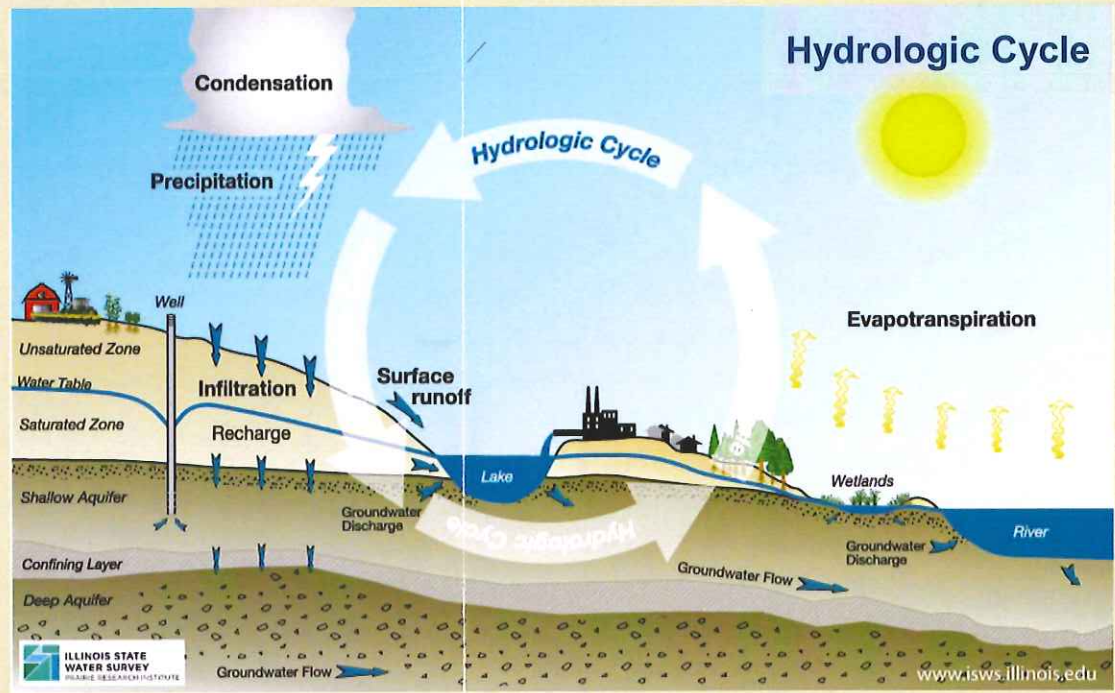

It is the mission of the City of Fenton to control the integrity of the City's water source through public awareness and education to ensure secure, clean, and reliable drinking water for present and future generations.

What is a Wellhead Protection Plan?

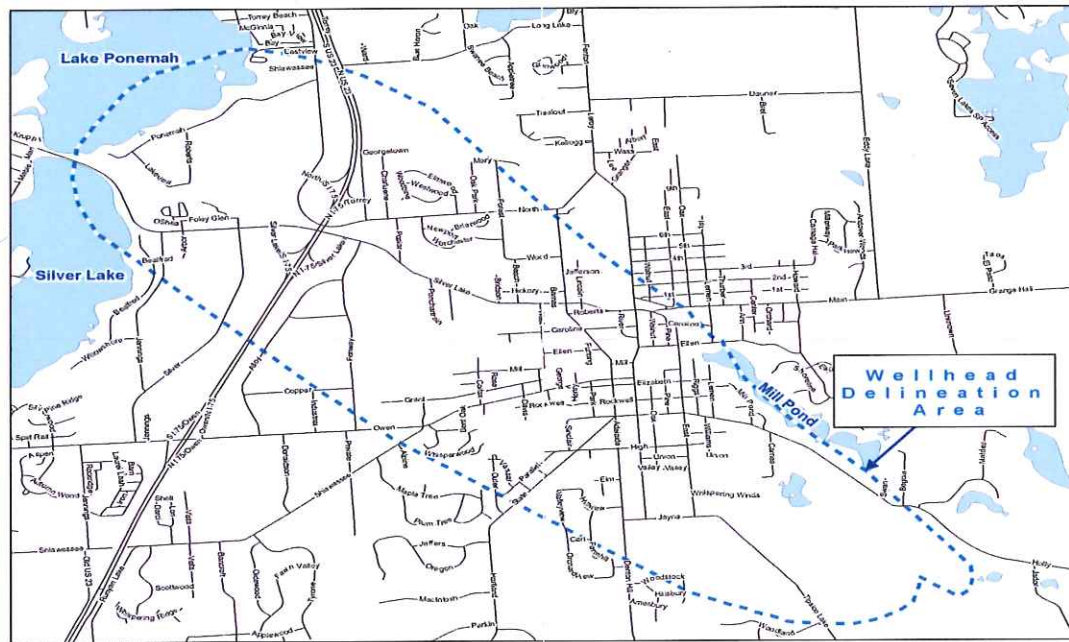

The City of Fenton has implemented this plan and a wellhead protection team that works to protect the City's local drinking water supply from contamination.

Where Does the City of Fenton's Drinking Water Come From?

The City extracts groundwater from four Type 1 groundwater wells located within the City that are the source of the City's municipal water supply.

City of Fenton's Wellhead Delineation Area

Why do we need a Wellhead Protection Plan?

The diagram above shows how surface water and contaminants can seep through the surface of the earth and into our groundwater resources. The contaminated water can then flow into a water supply well. Learn about our water sources and spread the information to friends and neighbors.
